ARTIFICIAL CHRISTMAS TREE ASSEMBLY INSTRUCTIONS

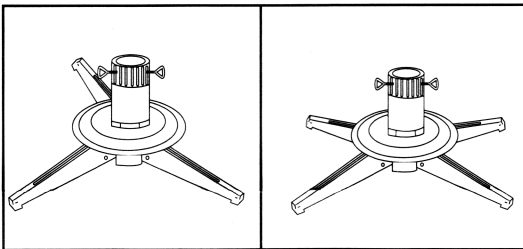

This pack contains:

- Tree Top
- Tree pole with branch brackets
- Coded branches
- Tree Stand

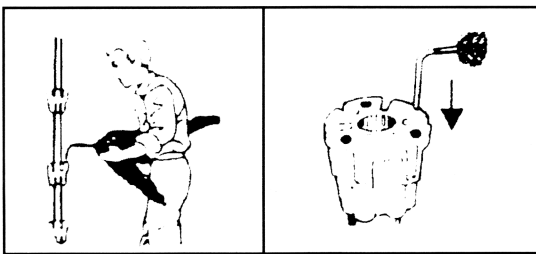

Please read these instructions carefully before assembling your tree.

SAVE THESE INSTRUCTIONS INDOOR USE ONLY

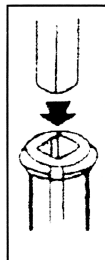

- 1: Assemble Metal stand as shown. Detailed instructions are given on the Polyethylene bag.

- 3: Position the branch at a comfortable working height on the tree by slotting the hooked end into one point on the bracket.

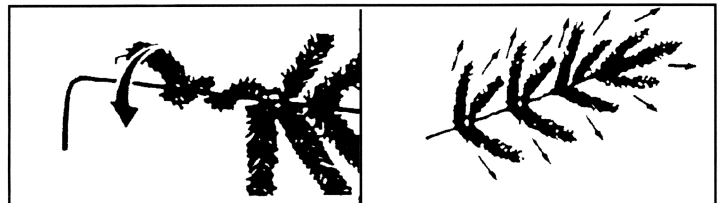

- 5: When all branches are shaped and correctly positioned, take tree top and insert into pole. Arrange branches into desired position. Finished look should be natural and full.

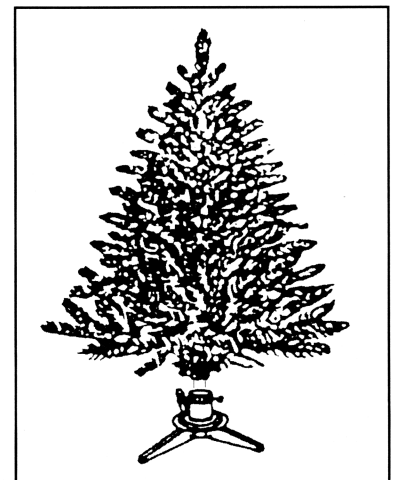

- 2: Put the tree pole into the assembled metal stand. Make sure that it is fixed into the central support. Tighten the screws so that it is held securely and perpendicular.

- 4: Shape the tree by arranging the branches into desired position. Finished look should be natural and full. Twist the last tip around the end of the branch to cover the wire. Insert branch into correct bracket. For detailed instructions see back side.

CAUTION:
Use only miniature or cool lights on this tree.

Do not leave near unguarded fire.

FLAME RETARDANT

STORAGE TIPS:

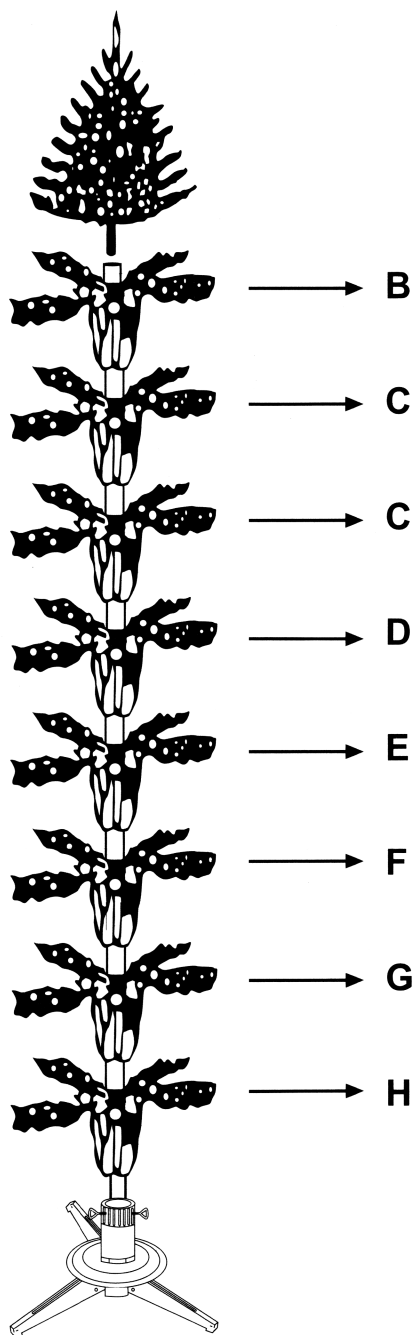

- * Remove all lights and ornaments
- * Work from top to bottom. Remove each panel, pressing branches against stem.
- * Place branches into carton with the longest branches at the bottom.
- * Store carton away from heat in a cool and dry place. Do not store in a damp area or in an area where the temperature exceeds 40C°.
